

ELYS TERMINAL

Station management system

ADAPTABLE
OPTIMISED
USER-FRIENDLY

Adaptable

From pump-side equipment to point of sale terminals, Elys lets you keep control of every device in your service station: distributors, payment terminals, price displays and more.

Optimised

By managing sales, payments and stock, Elys will optimise your operations and give you a clear perspective on your business thanks to a series of detailed reports.

User-friendly

With a full range of specialist training programmes and documents, plus a dedicated support team, LAFON will give you all the help you need to get started with your Elys terminal.

ELYS TERMINAL

+ PRODUCT

- A multi-management system
- Detailed station monitoring
- Customised according to your needs
- Reliable
- Easy to maintain

For more than 60 years, LAFON has been developing fuel distribution solutions, providing high-quality equipment and maintaining total client loyalty and satisfaction.

The Elys system was the natural next step. It is the ideal service station management system, for total performance by the pump and in-store.

Elys controls all of the pump-side equipment (distributors, payment terminals, tank stocks, price displays) and point of sale resources (tills, electronic payment terminals, statistics and reports).

Both modular and adaptable, Elys can be upgraded with various options. It will adapt to your needs to offer you a comprehensive, fully-optimised management system for your service station.
