

Creating solutions

Storage - Distribution - management

TANK CARRIERS

Well equipped to serve better

PETROLEUM PRODUCT DISTRIBUTION

A creative builder of solutions, we offer a full line of tank carriers and trailers built in all materials: stainless, aluminum or steel.

DOMESTIC LOADING OR API SOURCE

- > May be with or without vapour recovery (COV)
- > Product return system

MEASURED DISTRIBUTION ASSEMBLY

- > Electronic or mechanical
- > Volumetric or turbine

LAFON IS :

> ASSISTANCE & MAINTENANCE

Our Lafon Mechanical Maintenance Services (SEM) and our network of certified installer / maintainer partners assure you of assistance and care for your equipment.

> SEM 33 AMBARES ET LAGRAVE

1, Avenue des Industries -
33440 Ambarès
05 57 80 83 00

> SEM 17 PERIGNY

35, avenue Louis Lumière -

ELECTRIC OR PNEUMATIC REEL

- > Modular reel mounted on the subframe with a drip collection tray, flexible guide rollers and a gun holder.

STANDARD EQUIPMENT

- > Tool chest, lighting for valves and reels, aluminum walkway, pneumatically operated railing.

CHASSIS MOUNTING

- > Mounting of tanker vehicles on all ADR chassis on the market: tank volume adapted to the vehicle's G.V.W.

OPTIONS

- > Additive injector
- > Back-up camera
- > On request.

CONSTRUCTION SITE TANKERS - LUBRICANT CARRIERS

With our experience in the military field, we produce vehicles dedicated to mining and public works applications that can provide their service under the harshest conditions.

CONSTRUCTION SITE TANKERS

- > 20 000 liters
- > 6x4
- > Double distribution
- > EasyCarb

- > 20 000 liters
- > 6x4
- > EasyCarb

- > 10 000 liters
- > 4x4
- > Double distribution
- > EasyCarb

Our construction site tankers have the following characteristics

DISTRIBUTION

- > 1 or 2 distribution lines
- > Possibility to be compartmentalised
- > Front or rear distribution

FUNCTIONS

- > Measured distribution
- > Product transfer
- > High flow nozzle, auto-stop nozzle or nozzle specifically for public works.

SAFETY

- > Appropriate marking and signalling

SIMPLIFIED DESIGN

- > Simplified control circuit, easy to maintain and use

SIMPLIFIED DESIGN

- > Authorization and monitoring of distributions by an embedded E@SYCARB terminal

LUBRICATION CARRIERS

- > Mounting of service truck bodies for mining and PW machines

- > Storage and distribution of oils, greases, coolant and AdBlue®

REFUELLERS

We build refuelling equipment: tankers and trailers inspired by the most demanding military designs

STANDARDS

- > Adaptation to the specifics of destination countries
- > Flow rates from 5 to 150 m3/h

SPECIFICS

- > Available material: aluminum or stainless steel
- > From 1 to 4 distribution lines
- > Front or rear load
- > Single compartment
- > Bottom or dome loading

FUNCTIONS

- > Measured distribution
- > Absorber or separator filtration
- > Product transfer
- > Auto-loading
- > Product recovery
- > Coupler interface and/or nozzle

SIMPLIFIED DESIGN

- > Consideration of operating requirements in extreme conditions
- > Simplified control Circuit
- > Ease of maintenance
- > Ease of use

SAFETY

- > Compliance with international airport standards
- > Chassis mounting based on the ADR standard on the transport of dangerous goods by road
- > Filtration according to API/IP1583 or 1581, hose according to EN 1361

Manufacturing of rolling stock in our factories in France.

SPECIFIC FEATURES OF OUR LINE

Thanks to LAFON's expertise, our products have specific features designed to best meet your expectations

SUBFRAME - 1/2 SUBFRAME

Chassis mounting of Lafon vehicles

- > Compliance with chassis mounting instructions for optimum integration and reliability
- > Chassis mounting of tanker vehicles on all ADR chassis on the market
- > Construction possible in ALU / STEEL / STAINLESS
- > Use of validated design principles on military and export chassis mounts

LOWER CENTRE OF GRAVITY

LAFON expertise for :

- > Better driving comfort
- > Better vehicle stability
- > Improved safety

TRUCK ACCESSORIES

LAFON designs the following equipment :

- > Discharging valves
- > Distributions nozzles
- > Delivery and discharge hoses

LAFON IS :

> THE STRENGTH OF A GROUP

The Madic Group, strong and essential support for the development of LAFON.

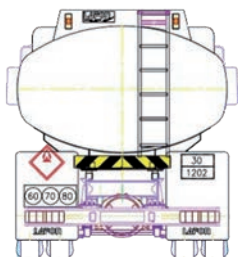

> THE EXPERIENCE OF A BRAND

At your side for over 50 years, we are working to satisfy your customers.

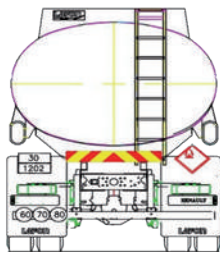

> A SPECIALIST IN DISTRIBUTION

Full knowledge of distribution of petroleum products gives us unique know-how.
